2020

COVID-19 situation evoked some new thoughts and ideas in our team. We started discussion about what kind of travellers we would like to be in the future, when the quarantine situation is going to be over.

We would still like to visit places but we wouldn't like to be a harm for the societies- we would not like to be a part of the tourist flood, that is overwhelming for locals.

After the pandemic can people trust each other, can they trust strangers? The invisible thing that this virus does is that people truly distance from strangers, meanwhile they are hungry for building closeness and connections. And this is how we tried to solve these questions.

We would like to introduce you to our brand new travel agency:
